More Than a Toolbox of Technical Skills

How Leadership, Business, Interpersonal, and Technical (LBIT) Assessment Relates to Your Job Hunt

Overview

- The four LBIT performance dimensions
  - Leadership, Business, Interpersonal, Technical
  - What happens without the first three: Nedry from "Jurassic Park"
- How LBIT runs through your career
  - Job hunt, development planning, and annual performance assessment
- LBIT in the specifics of your job hunt
  - Resume
  - LinkedIn Profile
  - Interview
- Mock interview: practice LBIT assessment live

Dimensions of Development and Mentoring Focus

Leadership

- Commitment to Excellence
- Owning your work
- Initiating action
- It's NOT just named officer positions in an organization. It's a behavior, not a title.

Business

- How to get work done & why the work is important
- Industry and Company Standards
- Work Processes & Stewardship
- Big Picture Understanding & Economics

Interpersonal

- Working in Teams
- Communicating to Stakeholders
- Networking

Technical

- Important, but undergrads tend to focus here and underestimate the other three

Setting and Accomplishing Development Goals · second-hand-tigers/badocter-career-learnings Wiki

Don’t Be the Technical “A” Who Gets an “F” on the Other Three

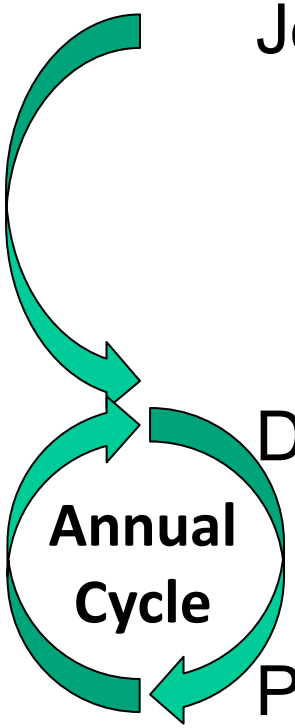

Jurassic Park's Nedry is a classic example of a failed expert who doesn't realize he's a failed expert

- Technical capability exceptional, despite Hammond’s complaints about system bugs (scope of work described would easily justify a team of 10)
- Acting ethically — Fail *(Leadership — an ethics failure will get immediate disciplinary action: likely termination and possible criminal prosecution)*
- Owning and addressing his own mistakes — Fail *(Leadership)*
- Caring about and mentoring the team — Fail *(Interpersonal & Leadership)*
- Communicating priorities, challenges, and wins effectively — Fail *(Interpersonal)*
- Business financials — Fail *(Business)*

	Leadership	Business	Interpersonal	Technical	Overall
Nedry thinks of himself	N/A	N/A	N/A	A+	**A+**
Hammond thinks of Nedry	F	F	F	C-	**F**
An Objective Supervisor	F	F	F	A+	**F**

The Failed Expert · second-hand-tigers/badocter-career-learnings Wiki

Your LBIT Assessment Has Already Started

- Job Hunt (Resume/LinkedIn/Interview)
  - You are being assessed vs other applicants (peers) on each dimension
    1) Will you contribute to the team's objectives and success?
    2) Will you be competitive in the LBIT performance assessment a year from now?
  - You are not just a toolbox of technical skills
- Development Planning
  - You will have assigned objectives in each LBIT dimension based on growth opportunities identified during assessment
- Performance Assessment
  - You will be graded vs your peers and progress on your development plan on each dimension → Did you grow what you agreed to grow?
  - Targets escalate with career stages
    - Non-technical share of the job: ~50% at Expert, 100% at Sponsor
    - You will eventually have to mentor across all LBIT dimensions and "influence without authority" above your pay grade

Mentoring Integration with Stage Development · second-hand-tigers/badocter-career-learnings Wiki

LBIT Screenings in Your Job Hunt

Resume

The hook that lands the interview.

One-way: applicant to interviewer. Every bullet is a lead-in for LBIT probing questions.

LinkedIn

Your public, two-way presence.

Interviewers read your profile; you read theirs. Every entry and every post is fair game.

Interview

The room itself.

The interviewer probes until all four dimensions are covered, unless you cover them first.

Same rule at every step: show you are not just a toolbox of technical skills.

Leadership, Business, Interpersonal, and Technical capability all need to shine in the Resume, LinkedIn Profile, and Interview. The Interview is the only stage where the interviewer can actively dig it out of you.

	Leadership	Business	Interpersonal	Technical	Overall
Resume	Up to You	Up to You	Up to You	A	(L+B+I+T)/4
LinkedIn	Up to You	Up to You	Up to You	A	(L+B+I+T)/4
Interview	Q&A	Q&A	Q&A	A	(L+B+I+T)/4

The Job Hunt · second-hand-tigers/badocter-career-learnings Wiki

You Probably Have Highlights Across LBIT for Your Job Hunt

- Leadership
  - ★ Mentoring/Tutoring
  - ★ Undergrad Research Projects
  - ★ Team lead in Extracurricular
  - ★ Volunteer in Education Outreach (e.g., Junior Achievement Finance Park, JA-in-a-Day)
- Business
  - ★ Internships/Co-op
  - ★ Active in a Professional Organization (e.g., AIChE, and not just paying dues!)
    - Interviewing Workshops, Researching Employers
- Interpersonal
  - ★ Mentoring/Tutoring
  - ★ Group Projects
  - ★ Team/Group Extracurricular Activities
  - ★ Volunteer in Outreach
- Technical
  - ★ Mentoring/Tutoring
  - ★ Undergrad Research Projects
    - Technical Electives
    - Base Engineering Curriculum

Many activities develop more than one dimension at the same time. Those are the ones to feature on your resume.

★ Can frame full LBIT narrative for Resume/LinkedIn/Interview

Extracurriculars · second-hand-tigers/badocter-career-learnings Wiki

Resume: One Bullet, Four Dimensions

Before: Technical only

Built a program to automate a manual data analysis process.

After: all four

Automated daily data analysis process, freeing up ~5 hours/week per application, eliminating errors, and meeting end-user requirement for instant analysis availability. Partnered with a software developer and a system engineer to deploy the pilot; developed job handover playbook and led training for company-wide rollout.

Dimension	Ask yourself	In the example
Technical	What did you do?	Automated a daily data analysis process
Business	Why did it matter?	Freed up ~5 hours/week per application, eliminated errors, and met end-user requirement for instant availability of analysis
Interpersonal	Who did you work with?	Partnered with a software developer and a system engineer to deploy the pilot
Leadership	How did you own it?	Developed job handover playbook and led training for company-wide rollout

Use ownership verbs (automated, partnered, developed, led), not "helped with." Across the whole resume, don't leave an all-Technical picture.

Resumes · second-hand-tigers/badocter-career-learnings Wiki

LinkedIn: Every Profile Entry Is a Potential Probe

- Interviewers may print your profile and go through it like your resume, looking for LBIT items to ask about
- Endorsements don't confirm competency: don't list a skill you can't back up in the room with an LBIT narrative

Principal Process Control Engineer | Jan 2023 – Aug 2025 | Beaumont, Texas

Before: a duty list

Beaumont Complex RTO/DMC fleet value capture and improvement lead

Optimization technology and work process innovation and implementation

Mentoring, people development, succession planning

Strategic and tactical asset support & resourcing

After: LBIT narrative

- Led fleet-wide value capture across the Beaumont Complex's Real Time Optimization (RTO) and Dynamic Matrix Control (DMC) portfolio, with the team contributing to sustained value capture exceeding $100MM/yr **(B, L, T)**
- Championed GitHub for RTO collaboration and knowledge retention, adopted as the company standard for the global RTO fleet the following year **(L, B, I)**
- Established the succession pipeline for the next Beaumont RTO/DMC Principal Engineers; one took over this role directly **(L, B, I)**

Same role, same facts: the difference is whether the reader can tell what happened and why it mattered. (Tags for reference only.)

LinkedIn · second-hand-tigers/badocter-career-learnings Wiki

LinkedIn: Do Your Homework on the Interview Team

Connect with your interviewers

As soon as you know who they are. Don't read anything into a pending request: some interviewers hold candidate requests until after a decision.

Follow, don't connect with, their team

Browse their connections to learn the team's roles and career paths. A follow is safer than a connection request.

Prepare a question for each interviewer

Draw it from their actual background. Have two or three each: intros often answer one before you get to ask it.

Keep posts professional

LinkedIn isn't Facebook or X. Political posts can alienate roughly half the interviewers before you ever meet them.

Build your network before you need it: a network built the week you need it is a thin one.

LinkedIn · second-hand-tigers/badocter-career-learnings Wiki

The Interviewer Is Working From a Script

It isn't a sign of disinterest or lack of preparation. It's doing real work for both of you:

Nothing gets missed

They're assessing you, taking notes for the hiring committee, and selling you on the team, all at the same time.

Keeps it legal and fair

It's written alongside a list of what should and shouldn't be asked. Parts may be set by corporate policy and backed by interviewer training.

Tailored to the role

It follows a common framework, re-tailored each time with questions specific to that opening.

They're nervous too. The person across the table may be running one of their first solo interviews, and the script keeps them from going blank.

The structure exists to give you a fair, complete shot, not to trip you up.

One Resume Bullet, Four Probes

Interviewer asks	You answer	Dimension
What did you do in the role?	"I automated a daily analysis that was being run by hand."	**Technical**
What was the motivation for automating it?	"It was a complex, resource-intensive task done by hand daily, prone to mistakes, and did not meet the end-user timing requirement. Automating it freed up about five hours a week per application, eliminated the errors, and made the analysis instantly available to all."	**Business**
Who did you work with on this effort?	"I worked with a software developer and a system engineer to hook it into the site's automation system. I led training for the company-wide rollout and wrote the handover playbook."	**Interpersonal**
(never asked)	*By now, how you initiated, owned, networked, and drove the effort has already come through.*	**Leadership** (inferred)

Same example as the resume bullet. A skilled interviewer covers all four dimensions with a few probes about a single role.

Interview Prep · second-hand-tigers/badocter-career-learnings Wiki

Cover All Four Before You're Asked

- When asked about a role, cover Leadership, Business, Interpersonal, and Technical yourself, instead of waiting to be walked through them one probe at a time
- Every answer is about what you did. Credit the team, but keep coming back to "we" and expect: "What did you specifically do?"
- You can't reliably do this cold. Practicing with classmates makes it feel natural instead of scripted when it counts

- ☑ **Leadership**
- ☑ **Business**
- ☑ **Interpersonal**
- ☑ **Technical**

There IS an "I" in "TEAM": recruiters are assessing how you function with a team and your own specific contributions. Show a balance of the two.

Resumes · second-hand-tigers/badocter-career-learnings Wiki

Mock Interview: The Game

1. Pair up: one Interviewer, one Interviewee. Odd number? Make a triad with an observer
2. The Interviewer holds the Interviewee's resume and the scorecard
3. Pick one resume entry and start asking questions to cover LBIT
4. Write down their responses, and continue probing until all four dimensions have been covered
5. Then take the next entry, or swap roles
6. Observers share what they noticed at the end of the round

Dimension	Covered?	What They Said
Leadership	☐	
Business	☐	
Interpersonal	☐	
Technical	☐	

Scorecard (paper copies provided)

Setup 2 min → **Round 1** ~7 min → **Swap: Round 2** ~7 min → **Debrief** 3 min

- A real interviewer works through 5-6 of these per one-hour interview: about 7 minutes each, notes taken live.

Mock Interview Practice · second-hand-tigers/badocter-career-learnings Wiki

Interviewers: what was hard?

That's the actual skill

Asking a good question, actually listening, and writing down what was said, all without an awkward pause. It gets easier with practice.

Now you've felt it

That's what the person across the table is doing in a real interview. They're nervous too.

Take it further

A real mock interview event is this same game, with a working professional in the Interviewer's chair. Chase those when you can.

Practicing the Interviewer's chair is worth as much as practicing the Interviewee's.

Mock Interview Practice · second-hand-tigers/badocter-career-learnings Wiki

More Than a Toolbox of Technical Skills

Activities	Pick ones that develop more than one dimension
Resume	Write bullets that hit more than one dimension
LinkedIn	Every entry is a potential probe; keep it current and professional
Interview	Cover all four dimensions before you're asked
Practice	Trade resumes with a classmate and play the mock interview game

BACKUP

Non-Technical Demand increases with Career Stages

	Stage	Focus	Work Scope
1	**Apprentice** 1-2 yrs	Learning the Business	• Training – Tools, Skills, Work Processes, Job Specific Theory • Tasks within project (under direction of Stage 2-3) • Collaborating
2	**Colleague** 5-10+ yrs	Implementing	• Competent on standard Application and Troubleshooting in own discipline • Leading and contributing to standard projects of predefined scope. Onboarding and training Stage 1 • Managing Stakeholder Communication & Expectations
3	**Expert** 10+ yrs 50%	Leadership/Mentoring **R&Rs with significant non-technical component**	• Defining Projects and Initiatives (Scope, Benefit, Cost, Time) • Advanced Application & Troubleshooting • Leading New Technology Pilots & Commercialization • Mentoring Stage 1-2 • Coaching, 1-on-1s, Shadowing/Delegating • Accountability on “Individual Development Plans”
4	**Sponsor** 100%	Strategic Vision Regional/Global Influence	• Developing the Strategic Plan (1 & 5 year) • Promoting the Strategic plan • Driving Emerging Technologies to Commercialization • Regional/Global Discipline Health

Technical Career Stages · second-hand-tigers/badocter-career-learnings Wiki

Crafting a Balanced Development Plan

Set at least one objective each planning cycle (~yearly) in each Dimension

1. Leadership
2. Business
3. Interpersonal
4. Technical

Focus on Quality over Quantity

- Setting too many goals can often result in none of them getting done well and feeling overwhelmed (3-4 items at most in each area)

Tie each objective to a tangible deliverable that requires the competency

- Training doesn't stick or deliver value without practical reinforcement
- Tie development accomplishments with value delivery in performance discussions

Identify & leverage a mentor strong in the competency

- You can't teach yourself if you don't know what you don't know
- Discuss your development plan with your Mentor & Supervisor regularly

Get a Mentor's input on your plan → Flush out your blind spots!
